PERSONAL

Date of birth: 06 Mar 2000
Nationality: Bangladeshi
Marital status: Unmarried

AFRIN AKTER CHISHTI

SALESFORCE ADMINISTRATOR

PROFESSIONAL SUMMARY

Salesforce Administrator at Field Nation, promoted from Junior Salesforce Administrator in 2025, with a background in customer support, quality assurance and team training. Experienced in keeping Sales Cloud and Service Cloud secure, clean and efficient, building Flow automation, validation rules and reporting, and connecting Salesforce with HubSpot, Gong and 6sense so sales, marketing and customer teams work from one source of truth. Certified 6sense Administrator with working knowledge of Agentforce, Tableau and Claude AI.

EXPERIENCE

Salesforce Administrator

01-2025 – Present

Field Nation

- Own day-to-day administration of Sales Cloud and Service Cloud, including the security model: licenses, profiles, roles, permission sets, sharing rules, field-level security and user onboarding and offboarding.
- Design and own automation with Flow, validation rules and approval processes, including assignments and escalations, to remove manual steps and standardize sales and customer workflows.
- Configure custom objects, fields, picklists, page layouts, Lightning pages and record types, turning requirements from stakeholders into scalable solutions and prioritizing the admin backlog.
- Own release management: build and test in sandboxes, deploy with change sets, then document and communicate updates to users, following Salesforce security and governance best practices.
- Build and maintain Salesforce reports and dashboards, plus Tableau views, giving Sales, Marketing and Customer Success clear visibility into pipeline, customer activity and team performance.
- Set data governance standards: Data Loader processes, de-duplication rules, field standards and routine data audits that keep records accurate and trusted.
- Administer the connected go-to-market stack: keep HubSpot marketing data and field mappings aligned with Salesforce and resolve sync issues at the source.
- Work with Gong so call and conversation insights sit alongside CRM activity, and administer 6sense (certified) for account intelligence, segments and intent signals that guide prioritization.
- Work with Agentforce, Salesforce's AI agent platform, to identify automation use cases and support AI-assisted workflows grounded in CRM data, keeping data quality and permissions in order so agents work from accurate, secure data.
- Partner with Sales, Marketing and Customer Success leaders to turn business needs into practical Salesforce improvements, and train users with clear guides and walkthroughs.
- Keep the org healthy and efficient: review field and automation usage, retire unused fields, flows and reports, and reduce clutter so users find what they need faster.
- Use Claude AI to speed up documentation, requirement summaries, data analysis and everyday admin workflows.

Junior Salesforce Administrator

04-2022 – 12-2024

Field Nation

- Handled daily user and access requests across Sales and Support teams: onboarding, license and profile assignments, and troubleshooting permission set and field-level security issues.
- Built and debugged record-triggered and screen Flows and validation rules, tracing errors caused by overlapping automation and fixing them without disrupting users.
- Carried out large data operations: bulk imports, exports and mass updates with Data Loader, with careful field mapping, de-duplication and post-load validation.
- Created and refined reports and dashboards, including cross-object reports and filtered views, and updated page layouts and record types as requirements changed.
- Investigated sync failures and data mismatches between Salesforce and tools such as HubSpot, Gong and 6sense, escalating and resolving the root cause.
- Assisted with sandbox testing and change set deployments, validating results and logging issues before and after each release.
- Resolved escalated support tickets, documented fixes and wrote user guides, building the platform knowledge that led to the promotion to Salesforce Administrator.
- Kept a log of recurring issues and proposed process improvements to the admin team to prevent repeat requests.

Customer Service Manager

11-2021 – 03-2022

Biztech Solutions

- Supervised day-to-day operations of the customer service department and kept the team focused on service quality.
- Developed customer satisfaction goals and coordinated with the team to meet them on a steady basis.
- Maintained accurate records of all customer service activities and discussions.
- Assessed service statistics and prepared detailed reports on findings for management.
- Hired and trained new customer service agents, coaching them on service standards.
- Monitored team performance against goals and gave regular feedback and coaching to agents.
- Stayed informed on the latest industry techniques and methods and applied them to improve team processes.

Quality Assurance and Training Officer

03-2021 – 09-2021

Sheba Platform LTD

- Designed, implemented and improved company quality standards.
- Determined, negotiated and agreed in-house quality procedures, standards and specifications.
- Analyzed data to find areas for growth and formulated strategies to increase productivity.
- Managed the recruiting process; trained, motivated, coached and corrected employees to ensure standards were met.
- Created reports documenting errors and issues to track progress over time.
- Worked closely with the development team to improve existing products and services.
- Aligned teams across the company on quality expectations and corrective actions.

Sr. Customer Service Executive

02-2020 – 11-2020

Chaldal.com

- Maintained financial accounts by processing customer adjustments accurately.
- Fulfilled customer requirements to enhance service delivery approaches.
- Resolved customer complaints, managed database records and drafted status reports on customer service issues.
- Preserved revenue streams through strong communication and negotiation, offering refunds only as a last resort to keep customers satisfied.
- Kept records of customer interactions, transactions, comments and complaints.
- Followed company policy and escalation procedures to resolve complaints efficiently.
- Communicated with customers through various channels.
